Realtime Effective Writers of Music

REWMUSIC has been writing songs for over 15 years for different occasions, companies, and artists. Using different sounds, styles, and techniques. The finished product is a wonderful musical piece to be heard on any platform. REWMUSIC can write sections only, or a complete song with any song structure that's required. One of our specialties is composing in different genres and sometimes we infuse them together. Our collaboration team is on hand for fresh ideas to be created. We offer music themes for TV/film with instruments only or vocals with or without harmonies or background vocals created by Regina E. Ross. She is a graduate of Berklee School of Music emphasis in Songwriting.
